### **NSE Indices launches Nifty Smallcap250 Momentum Quality 100 index**

NSE's index services subsidiary, NSE Indices Limited today launched a new strategy index – Nifty Smallcap250 Momentum Quality 100 index.

The Nifty Smallcap250 Momentum Quality 100 Index aims to track the performance of the 100 small cap stocks selected based on combination of their momentum and quality factor scores.

The momentum score for each company is determined based on its 6-month and 12-month price return, adjusted for volatility. The quality score for each company is determined based on return on equity (ROE), financial leverage (Debt/Equity Ratio) and earnings (EPS) growth variability analyzed during the previous 5 years. The weight of each stock in the index is based on the combination of composite momentum-quality score and its free-float market capitalization. Stock weights are capped at 3% at the time of index rebalancing.

The base date for the index is April 01, 2005, and the base value is 1000. The index will be reconstituted and rebalanced on a semi-annual basis.

The new index is expected to act as a benchmark for asset managers and be a reference index tracked by passive funds in the form of Exchange Traded Funds (ETFs), index funds and structured products.
